

Redefining Area of Refuge (AOR) emergency 2-way communication.

**Sentinel™ AOR helps future-safe
your investment in Area of Refuge
solutions required
in multi-story buildings.**

Continuing to lead the way

- Market leader with 20,000+ installations
- 4800 IP harnessed the power of internet protocols
- Now, Sentinel™ AOR introduces the next-generation of Area of Refuge capabilities

Easily updatable and expandable

- Quickly adjust to code changes
- Supports unlimited number of POE endpoints and call stations
- Hardware independent – most system components can be interchanged based on vendor preference
- Intuitive web interface simplifies programming

Interoperability keeps your options open

- Facilitates the integration of a range of technologies
- Building Management Services (BMS)
- Fire panels
- Cloud systems
- Mobile companion applications

Cost-effectively simplify maintenance

- Cornell or installer can remotely monitor and manage the system, improving reliability while reducing maintenance costs
- Features Sentinel Fault Notification Detection System to proactively address potential issues

Sentinel™

Take Area Of Refuge (AOR) Emergency 2-Way Communication to Another Level

Single-source convenience for all Area Of Refuge (AOR) System needs

- POE endpoints
- Call stations
- SIP touchscreen master stations
- AOR Signage
- Power supplies
- POTS, SIP & GSM connectivity
- Expansion switches
- Network engineering & design services
- Sentinel Fault Notification & Detection System
- 24/7/365 monitoring & management
- Technical support

Be ready for the future of occupant safety

Sentinel™ has evolved to keep pace with the everchanging needs of multi-story buildings. Full ownership of the source code for VoIP applications and management/administrator tools enables quick adjustment to changes in building codes. Innovative network design supports unlimited POE endpoints & call stations as well

as interoperability with BMS and other technologies. The result is the ultimate future-ready system capable of easily accommodating facility expansions on up to the most ambitious AOR projects imaginable.

Sentinel™ Area Of Refuge Emergency 2-Way Communication solutions family accommodates virtually any budget and multi-story building need.
